

RESEARCH CENTER  
TRUSTWORTHY DATA SCIENCE  
AND SECURITY

**We are hiring!**

**PhD Position in  
Environmetrics**

tu

# Your research focus

- **Inferring spatio-temporal climate variability from sparse data**
- **Latent Gaussian Markov Random Fields & SPDE approaches**
- **Integrating observational constraints into future Earth system projections**
- **Distributional statistical postprocessing with copulas**

# Your profile

- Strong background in probability theory, statistics, or stochastic analysis
- MSc (or near completion) in statistics, mathematics, data science, physics, or related fields
- Programming skills (R or Python; Julia/C++/Fortran a plus) 
- Strong English proficiency
- Strong interest in applying statistical methods to open questions in climatology

# Apply now

 Application deadline: March 12, 2026

 Send your documents (motivation letter, CV, certificates, 1-page MSc thesis summary, two referees) as one PDF to:
